ABOUT

Junior Software Developer with over a year of hands-on experience in full-stack and backend development, API integrations, and database-driven systems. Currently working in a production environment using modern web technologies while completing a Master of Computer Science part-time. Strong communicator with a customer-focused background, able to translate technical concepts into practical solutions and collaborate effectively within development teams.

EDUCATION

University of Queensland, QLD, Brisbane

- *Bachelor of Computer Science, Major in Programming Languages, GPA: 5.75* **Graduated Nov 2024**
- *Currently studying a Master of Computer Science part-time while working as a full-time software developer.*

EXPERIENCE

Woolworths – Service Supervisor

Nov 2019 – June 2023

- Led and supported team members in a fast-paced retail environment, developing strong leadership, time management, and communication skills.
- Resolved customer issues efficiently while maintaining a high standard of service.

Umart – Customer Service Officer / PC Technician

June 2023 – Dec 2024

- Enhanced technical troubleshooting skills by diagnosing and building custom PC systems.

UQ Industry Mentoring Program

September 2024

- Mentee to **Justin Dray**, Senior Security Engineer at **Amazon, Inc.**
- Gained industry insight into large-scale systems, security practices, and career development within the software engineering field.

Junior Software Developer & Customer Support - (Full Time)

Jan 2025 – Present

- Provided technical and customer support for production software systems, working directly with clients to diagnose issues, explain system behaviour, and deliver clear, solution-focused outcomes.
- Developed backend applications using **Python** and built frontend interfaces using **Python (PySide)**, supporting internal systems and user-facing tools.
- Designed and worked with **MySQL databases**, including schema design, query development, and data validation to support API-driven applications.
- Developed and maintained integrations with **external and public APIs**, including **ATO services**, and accounting platforms **Xero and MYOB**, enabling compliant export of payroll data.
- Supported full-stack development tasks across **React, JavaScript, HTML/CSS**, and **PHP**, contributing to feature development and ongoing system maintenance.
- Assisted with debugging, testing, and deployment activities, working collaboratively within a development team and adapting quickly to new systems and tools.
- Communicated technical issues, design considerations, and customer feedback clearly through written documentation and team discussions.
- Utilized **Docker** to containerise full-stack applications, streamlining development, testing, and deployment workflows across multiple environments.
